

The Minotaur King senses your approach. He is not very happy that so far you have defeated all of his agents.

...so he has unleashed a
creature to destroy you
once... and... for all!

The mysterious creature is a scavenger that has been programmed to think that you are “dead”.

Think about this: Why would a creature be set out to destroy you if it already thinks that you are dead? Can you solve this riddle?

At this moment, You feel the
uncomfortable tingles of these
creatures all over your body.

There are literally thousands of these creatures gnawing on your skin, inside of your ears, nose, and mouth. They are eating you alive.

There is only ONE way to
defeat these creatures.

You MUST Outsmart them!

To do so, perform some tests on a few of these creatures to determine all aspects of their niche.

Once you determine their proper niche, you must report your findings immediately.

Then you must build this creature a proper habitat (simulated) using your experimental findings.

Only then will they realize that it is NOT YOU that they really want. They will then crawl off of your body and leave you alone!

You only have 40 minutes to live. Fail this mission and you will die. Succeed and you will live and earn 100 gold.

XP: 350 Maximum

Hurry, the clock is ticking!
